

Functional Intrinsic

**DriWeave® Woven  
Top Cover**

**NST® Ultra Thin  
Non-Skid Bottom**

**12mm Heel Cup  
Intrinsically Posted**

**3mm Polypropylene Shell  
With Intrinsic Forefoot Post**

The team at Performance has developed a functional OTC orthotic that is only available through practitioner offices.

Linear Foot Motion devices use trusted podiatric designs to control your patients foot through out the gait cycle.

- Employing a 12mm heel cup and an intrinsically posted rear foot and forefoot 3mm polypropylene shell.
- A full foot EVA interface with woven fabric top cover to protect your patient from the forces of pressure, shock and shear.
- An NST® non-slip extension bottom resists separation at the metatarsals and provides extended life to this beautifully crafted appliance that's the perfect addition to your practice.
